

UBC Millwrights Comprehensive Solutions in Material Handling

Our Certified Rigger and Signaler Program is now accredited by the National Commission for Certifying Agency. The certification exceeds all requirements for riggers and signalers in the USA and Canada.

The best asset a material handling crew can bring to a project is productivity. When millwrights from the United Brotherhood of Carpenters are on site, that productivity is guaranteed through the skills, training, and experience of our technicians, and the smart business sense and competitive pricing of our contractors.

We understand that no two installation projects are alike, and we approach every project as an individual challenge. Our millwright contractors know they are successful when the customer is as productive as possible.

We establish a communication system immediately with a pre-project conference to outline the scope of work, manpower needs and scheduling issues. That interaction remains throughout the life of the project.

And, when installations are done within active facilities, we work with you to complete projects without interrupting or delaying operations by adjusting work schedules around peak production hours and scheduling shifts during non-typical work hours.

Equipped with the Proper Skills

UBC Millwrights have the training and experience needed for the most simple to the most complex layout. Our technicians are ready to supply quality, competitive work in:

- Allied equipment
- ASRS systems
- Automated systems and storage
- Carousels
- Conveyors
- Electrical and mechanical installation
- Integrated systems
- Monorails
- Parcel shipping
- People movers
- Rack systems and storage
- Systems integration
- Warehouse management

Our experience and skills are unmatched in working with the following material handling components:

- Belts
- Catwalks
- Chain rollers
- Dismantlement
- Electronic communications
- Guard rails
- Hangers
- Headers
- Installation
- Layout and planning of conveyor and rack systems
- Loading and unloading
- Maintenance
- Material handling
- Piping
- Relocation
- Repair
- Replacement
- Site prep
- Staging and materials relocation
- Support structures
- Testing
- Tune-up

Partnering with the UBC nets the following assets from our millwrights and contractors:

Dedication: We come to work every day with a positive attitude, a professional appearance, and a determination to finish the job correctly the first time.

Availability: Our thousands of millwrights enable our contractors to be fully staffed at all times, which allows for quick response to emergencies and other installation challenges.

Timeliness: Meeting schedules is key, and our crews know that fast, accurate installations are priority one.

Flexibility: Compressed schedules, adjustments in daily work hours, work days and work weeks, and adjusting staffing numbers are just some of the strategies we will employ to keep your project on time and on budget.

Customer Service: We are trained to not only finish work according to the customer's satisfaction, but to follow through with training, maintenance and customer service. One call puts the best-trained maintenance crews at the work site to

get the system up and running as fast as possible.

Our Excellence is Grounded in Training

Our millwrights and instructors train on the most advanced equipment and tools in the

industry. We focus on conveyors and other material handling systems with a standardized curriculum, so that regardless of job site location, UBC millwrights bring the same skill set to every project. As a result, our unmatched training creates professionals who are not only proficient in all material handling skills, but also who understand the importance of health and safety practices.

Material Handling coursework includes:

- Basic & Advanced Layout and Leveling Instruments
- Basic & Advanced Laser Shaft Alignment
- Blueprint Reading
- Bulk Conveyor Systems
- Can Manufacturing Plant Systems
- Clean Room Procedures
- Construction Mathematics
- Heavy Industrial Manufacturing
- Lift Truck Operator Rigging
- Machinery Installation, Repair, & Maintenance
- Material Handling Processes
- Mathematics, Layout, & Blueprint Reading
- Monorail Conveyor Systems
- Precision Alignment
- Precision Rigging
- Scaffolding
- USPS Bulk Mail Qualification
- Valve Installation and Repair
- Welding

Special Attention to Safety

There is no substitute for solid attention to safety, and the UBC believes a safe work site is achieved only by comprehensive training for every millwright on every project. Our members must complete and achieve mastery of the following health and safety training programs:

- Asbestos Worker
- Blood Borne Pathogens
- Cardio Pulmonary Resuscitation
- Confined Space Worker Safety
- Ergonomics
- Fall Arrest
- Hazardous Waste Worker Safety
- Lead Abatement Worker Safety First Aid
- Lock-Out/Tag-Out Safety
- Material Safety Data Sheet Competency
- Millwright Health & Safety 16-Hour Course
- Occupational Safety & Health Act 10-Hour Course
- Occupational Safety & Health Act 30-Hour Course
- Scaffold User Safety

Responsive Maintenance Service

UBC Millwrights are experienced in the all-around knowledge needed to be excellent diagnostic experts for maintenance challenges. We are trained to recognize and differentiate the needs of individual lines. We understand the logic needed to determine the problem, and fix the issue to get the system up and running as fast as possible. Our technicians are adept at:

- Troubleshooting
- Electrical controls
- Mechanical systems
- Programmable logic controllers

Bottom Line

By using UBC Millwrights, you are assured quality, productive work, from pre-planning to maintenance. Our promise is simple:

- We will do our work safely, accurately, and dependably.
- We will respond to all requests promptly and will deliver the service that we promised.
- We will communicate early and often and will involve the customer every step of the way.
- We will complete projects according to specified schedules with pride and integrity.

Your goal is our goal.
